ELIET®

TURFAWAY600

For major lawn renovation that requires complete reconstruction, it is essential to remove the old turf. By removing a thin top layer, you can not only remove weathered grass plants, but also any overgrowth of weeds, moss and other parasites that have settled into the lawn over the years. It is good to start the new lawn with a clean slate.

The ELIET TURFAWAY 600's unique concept allows you to **quickly** loosen a thin turf layer **with precision**. . The unique construction of this sod cutter on tracks ensures a **stable machine** with optimum soil grip, which ensure maximum comfort for the operator. Thanks to the **increased traction** the tracks provide, the ELIET **TURFAWAY** can loosen sods that are **60 cm (24") wide**.

This guarantees optimum yield.

> Optimum grip

Sods should preferably be loosened when the soil is damp. The tracks have a **greater contact surface** on the soil, which provides **maximum grip and better traction**.

> Optimum manoeuvrability

The propulsion of the tracks is **hydrostatic**. The speed of each track can be adjusted so that the machine takes corners smoothly and can even turn **on its axis**. That is why the **TURFAWAY** can be used for any lawn.

> Optimum operating comfort

It is super-easy to operate the **TURFAWAY**.

The **clutch for traction and blade propulsion** is operated with the left hand. The right hand is free to steer the machine via a **centrally-located joystick**. To get the **blade** to the initial depth you want to work, this is simply done with your leg and foot by depressing it. The handlebar has **vibration dampers** to increase the comfort of the operator.

> Optimum cutting

To be able to cut thin, attached sods, the cutter was placed **behind** the tracks. When it is being loosened, the sod can move freely and will no longer be pressed down by the machine.. Thanks to the coaxial eccentric motion, the **TURFAWAY** cutter makes beautiful, **horizontal cutting movements.** This helps in keeping better track of the depth and there is less chance of sod breakage. The **working depth** can be adjusted **quickly and easily** with one handle and a helpful diagram.

> Optimum yield

With its **60 cm-wide** cutter, the **TURFAWAY** has the largest standard working width on the self-propelled sod cutter market. The grip the tracks provide ensure that the machine keeps delivering its yield under all circumstances. The **cutter can be set at an angle** so that, depending on the type of soil, it can always be on the right setting.

technical file

	TURFAWAY 600
Motor	Honda GX200
Start	handstart
Capacity	6,5 HP
Depth setting	0 up to -60 mm (up to 2 1/2")
Cutting speed	800 st/min
Stroke length	38 mm (1 1/2")
Working width	600 mm (24")
Width of tracks	100 mm (4")
Contact surface with soil	960 cm² (1sq.ft.)
Steering	Joystick

Track propulsion	Hydrostatic
Driving speed	-4 km/u < 0 > +4km/u (2,5m/h)
Dimensions (L x B x H)	145 cm x 62 cm x 99 cm (57 x 26 x 39")
Weight	195 kg (430lbs)
Comfort	Anti-vibration handlebar
Noise capacity Lw(A)	95 dB(A)
Options:	Supplementary weight 60 kg (132lbs)
